## **NEW WRITING CENTER OPENS TO HELP YOU**

The WRITING ACROSS THE CURRICULUM Center is a new program at Ohio State University Lima that offers ALL students the opportunity to talk with a qualified tutor about writing assignments. Writing is not just for English classes. Every discipline wants writing that is clear, concise, logical, and easy to read. One of the best ways to help people become better writers (and better all-around students) is to provide one-on-one help. The WAC Center assistants will: help you learn to do word processing, help you understand your assignment and your instructor's expectations, read your work in any stage, provide constructive feedback on your writing, discuss ways to make your writing more clear and effective, offer guidance and organization, help you find your error patterns, be honest and sincere, and offer encouragement and support. Center tutors will not: take responsibility for any stage of your work, proofread or edit a paper for you, type a paper for you, or give you any estimate of a grade to expect. The Center staff will also acquaint you with methods of accessing the Internet and using E-Mail. The computer can open up a whole world of information for you. You can stop by the WAC Center located in GA 134 on Mondays, Wednesdays, and Fridays from 9:00-10:00 am. The Center will be located in GA 428 from 12:30-4:30 pm. on Mondays, Tuesdays, and Thursdays and from 1:00-4:30 on Wednesdays. Or make an appointment for a time that is convenient for you. Appointments are usually in 25 minute increments. The Center is staffed by 8 trained student tutors and is under the direction of Dr. James Werchan. For more information and to make an appointment see Dr. Werchan in Reed Hall 135 or call him at 221-1641, Ext. 882. You may E-Mail an inquiry to OSULWACC@OSULIMA2.edu.

**It seemed to be the perfect mission: another trip to the moon for three of NASA's finest astronauts. But when Apollo 13 pilot Jim Lovell uttered a simple, heart-stopping message across the dead of space, "Houston...we've got a problem," mission control and the rest of the world would soon learn that something had gone horribly wrong.
